SECTION 4: First aid measures

4.1 Description of first aid measures

Inhalation

Acute affects following exposure to this product via the inhalation route are not anticipated during normal handling and use.

Skin

This product is not intended for use on skin. If skin irritation occurs, get medical advice.

Both a toxicological risk assessment and dermatological patch test conclude that Clinell Universal Spray is well tolerated and poses a negligible risk of developing an allergic reaction when used as intended.

Eve

This product contains components classified as damaging to eyes. Due to the high volume of water also present in the formulation, the dilution effect means that the classification through CLP does not result in the hazard being carried through to the product.

Nevertheless, should eye irritation be experienced, this effect would likely be transient. But should symptoms persist, seek medical advice.

Ingestion

This product is for external use only and should be kept away from children. No adverse effects are anticipated from the formulation via the oral route during normal handling and use.

4.2 Most important symptoms and effects, both acute and delayed

This product contains PHMB which may produce an allergic reaction.
